

Digital Thermo-hygrometer manual CH-905

一、 Specifications:

Temperature Range: -10°C-50°C (14°F ~ 122°F)

Humidity Range: 10%-99%

Temperature Accuracy: ±1°C at 0°C~40°C, ±2°C at other range

Humidity Accuracy: ±5% 40%~80% at 25°C, ±8% at other range

Resolution: Temperature 1°C, Humidity 1%RH

Unit Size: 93.5×114.5×22mm

N.W.:130g

Power supply: 1*1.5V(AAA) battery

二、 Features:

- 1、 Large LCD, display temperature, humidity, simple operation.
- 2、 Temperature °C / °F switch function, can choose display Celsius or Fahrenheit to meet different people's habits.
- 3、 MAX/MIN temperature & humidity memory function, clear memory function, restart function.
- 4、 Have bracket and hanging hole behind the product, can be placed standing or hanging.
- 5、 Low power consumption, high precision and high stability

三、 Operation Instruction:

Open the battery tank and take out the insulator(install the battery), current temperature and humidity will display when powered on.

(一) **Front buttons** : “MAX/MIN”“CLEAR”“C/°F”

- 1、 Press“MAX/MIN” , the record of highest and lowest temperature and humidity from powered on can be check.
- 2、 Press“CLEAR”, clear the memory value.
- 3、 Press“C/°F”, choose display Celsius or Fahrenheit.

(二) **Back button**: “RESET”

Press“RESET”, restore the factory default settings.

Notes:

1. When the digital display becomes faint, the battery needs to be replaced to keep accuracy.
2. The MAX/MIN memory will be cleared away when battery is re-installed
